

SRA, Inc is seeking a Scenario Designer to join an established team responsible for Missile Defense System (MDS) Ground Test (GT) scenario design and planning for the Missile Defense Agency (MDA). Ideally, a highly qualified candidate will have knowledge of the MDS and associated adversaries, be able to analyze requirements and constraints for GT scenario designs, possess the desire and capability to utilize existing team developed tools, and quickly learn processes and procedures for GT design. This candidate loves to put puzzles together, analyze everything, continually learn, innovate, and produce excellent products

JOB REQUIREMENTS

- BS in Engineering, Math, Computer Science, Physics, or similar technical discipline
- 5 years of experience in system analysis or characterization of MDS components to include weapon system and/or radar analysis experience
- Excellent presentation and communications skills
- Highly motivated and committed to completing tasks with excellence and within deadlines
- Be able to effectively work within a fast-paced team environment; active SECRET clearance.

Desired Capabilities:

- SQL, Tableau experience

Additional Eligibility Qualifications

- SECRET security clearance is required
- The flexibility to work occasional non-duty hours or on weekends to support specific test requirements.
- Previous MDA experience is desired.
