

SRA, Inc is seeking a Software Engineer to join an established team providing software development and support for the Missile Defense Agency (MDA). A highly qualified candidate should have significant experience with .NET, C#, and WPF. Ideally, a candidate is comfortable working in a small team and has the flexibility and creativity to balance code quality as well as maintainability while expanding an active codebase. Candidates will be expected to work directly with analysts to gather feedback, define stories, and implement new features in an Agile software environment on a daily basis.

Job Requirements:

- BS in Engineering, Math, Computer Science, Physics or similar technical discipline
- 6+ years of development experience
- Active SECRET Clearance
- Proficient with .NET C# and WPF
- AGILE experience

Preferred Skills:

- Experience with Modeling/Analysis
- Familiarity with MATLAB and/or Python
- Experience with Test Driven Development
- Familiarity with Git/GitLab
- Experience with Microsoft Azure or other cloud computing platforms
